Curious and motivated undergraduate pursuing AI/ML engineering, focused on developing skills through projects and research in intelligent systems.

EDUCATION

Bangladesh University of Professionals **Mirpur, Dhaka**
BSc in Information and Communication Engineering *Expected Graduation, August 2026*

- **Concentrations:** AI/ML, MLOps, Data Science
- **CGPA:** 3.76/4.00
- **Related Coursework:** Artificial Intelligence, Machine Learning, Statistics & Research Methodology, Data Structures & Algorithms, DBMS (SQL), Operating Systems, Cloud Computing, System Design, Discrete Mathematics, Information Network & Software Security.

PROJECTS

Scalable Web Scraping System

Solo Project *May 2026*

- Developed a Python web scraper to extract structured product data from e-commerce platforms, analyzing **session management, request headers, and anti-bot protection** mechanisms such as sliding CAPTCHA systems.

A Multi-Level AI Tic-Tac-Toe Engine w/ Minimax & Heuristic Search

Solo Project *February 2026*

- Developed a modular Tic-Tac-Toe game in **Python** featuring Human vs Human and multi-level AI modes (Random, Heuristic, and Minimax). Implemented **recursive Minimax search** algorithm with game state evaluation and decision optimization.

Spiral Handwriting Image Preprocessing for Parkinson's Detection

Team Leader *October 2025*

- Developed a preprocessing pipeline for spiral handwriting images using **OpenCV, skeletonization,** and **noise/artifact removal** to prepare datasets for ML models analyzing motor impairment.

Crafty Cat

Team Member *November 2024*

- Developed an **E-commerce website** using **Java, Servlet, HTML, CSS,** and **JavaScript**, providing students and enthusiasts with a platform to sell handmade and unique items. The project resulted in a user-friendly and efficient marketplace that supports entrepreneurial efforts while showing my **full-stack web development** skills.

EXPERIENCE

Intern - Youth School for Social Entrepreneurs (YSSE)
Content Writer *March 2025*

- Responsibilities included composing 40+ blogs, educational content, designing feature images, and submitting 15+ engaging titles for the YSSE Blog. Collaborating with the team to create well researched and compelling materials.

EXTRACURRICULAR

IEEE BUP Student Branch Women in Engineering (WIE) Affinity Group – *Chairperson* *May 2024 - Current*

- Coordinating an organization of 150+ members, overseeing educational, skill-building, and networking events.
- Managing and leading member engagement, recruitment, content management, and outreach initiatives focused on bridging the gender gap in STEM, with an emphasis on engineering.

AWARDS & ACHIEVEMENTS

- **WIE Outstanding Student Volunteer Award – Honorable Mention (2025):** Recognized for exceptional leadership, volunteer commitment, and contribution to technical and community-driven initiatives within IEEE BD Section (BDS).

SKILLS

Programming: Python, Java, C++, SQL (MySQL), Dart
Machine Learning & Computer Vision: Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib, Seaborn
Tools & Development: Visual Studio Code, IntelliJ IDEA, MySQL Workbench, NetBeans, Git, Trello, VMWare, MATLAB
Others: Google Workspace, Google Sites, Canva, MS Office tools
Languages: Bangla (Native), English (Fluent)
